Nimble AMS

- | | |
|--|----------|
| <p>Fix for Accrual Dues Bug Since this is an unmanaged package, any existing consumers will need to apply the same ~10 lines of change to their existing classes. Alternatively, they can uninstall and reinstall the next version of the package (ex: 1.19) if they have no customizations</p> | AMS-2463 |
| <p>SOAP API API enhancements to the Authorize.net XML API internally in Nimble AMS have been put in place to migrate from the Authorize.Net SOAP API before it is shutdown in march of 2018, rendering our legacy recurring functionality totally inoperable.</p> | AMS-8267 |
| <p>Many order Items If your org have lightning enabled, the list of order types can now be served in a dropdown list. Activate the "OrderProcessTypeDropdownSPR18" tag to enable this feature.</p> | AMS-8533 |
| <p>Clickjack Protection To better support ClickJack Protection enablement, the VisualForce pages displayed on the Order and Account record detail pages have been updated.</p> | AMS-8814 |
| <p>Select an Evaluation Record There is a new lightning component which allows users to select an evaluation record from a select list.</p> | AMS-8818 |
| <p>No Business Rules When no business rules are available, a message will be displayed on the business rules page indicating as much.</p> | AMS-8862 |
| <p>Order Tab The Order tab has been renamed so that it is no longer a developer label, but just says, "Order"</p> | AMS-8869 |
| <p> Query Locator To prevent the CalculateAccountFinancials Job from failing with an Invalid Query Locator error subqueries were moved to the execute method for each batch of accounts.</p> | AMS-8911 |
| <p>Order Adjustments The applyCoupon() method was added to the Order class specifically to support adjustments.</p> | AMS-8970 |

Expiration Check The ExternalPaymentProfile expiration check logic now correctly calculates the prior month's year.

AMS-8976

Nimble Communities

 **Filter Configuration** The Filter Configuration page of Community Hub Setup now loads correctly for filters without a Datasource.

NC-4192

Affiliation Search Context Roster management was updated to consider the current company when subsequent searches are executed.

NC-4373

 **Payment Source** The Payment Source is set to Self Service on payments made from stored payments in Community Hub.

NC-4374

 **Express Payments and Inventory Tracking** The Express Payment page now correctly queries the fields required for Merchandise products with Inventory Tracking.

NC-4413

Button Sort Order Community Hub buttons now respect the Sort Order defined on their respective Custom Metadata Type record.

NC-4422

Inverse Query Conditional A new Access Control class has been created named InverseQueryConditional. As its name implies, it does the exact opposite of QueryConditional, meaning it will only permit access to the button, card, page it is attached to if the selected Query record returns NO results.

NC-4426
